DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Group 1, the species shown in Figs 1 and 5;

group 2, the species shown in Fig 2;

group 3, the species shown in Fig 3;

group 4, the species shown in Fig 4;

group 5, the species shown in Fig 6;

group 6, the species shown in Fig 7;

group 7, the species shown in Fig 8;

group 8, the species shown in Fig 9;

group 9, the species shown in Fig 10;

group 10 the species shown in Fig 11;

group 11, the species shown in Fig 12;

group 12, the species shown in Fig 18.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim appears generic.

The elected species will be examined with one species of an anchor aperture shown in Figs 13-17 and one species of an end tab connector shown in Figs 19-25. Accordingly the applicant is required to elect one species of the anchor aperture and one species of the end tab connector to be examined with the elected species of the mentioned groups 1-12.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Conclusion

1. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Faye Francis whose telephone number is (703) 306-5941. The examiner can normally be reached on 6:30 AM - 3:00 PM Monday-Friday.
